Professional Summary

Motivated and detail-oriented Electronics and Telecommunication Engineering graduate (2025 pass-out) with a strong foundation in software development. Currently working as a Programmer Analyst Trainee at Cognizant Technology Solutions, with hands-on experience in Full Stack .NET development.

—Skills

Languages: C, C++, C#, JavaScript, TypeScript

Frontend: React.js, Angular, HTML, CSS, Tailwind CSS, IndexedDB (Offline Storage)

Backend: .NET 8, gRPC, CQRS (MediatR), Microservices, Node.js, Express.js, Serilog

Database: PostgreSQL, SQL Server, MongoDB, Redis, Entity Framework Core

Version Control System: Git, GitHub

Soft Skills: Critical thinking, Data-driven decision making, Problem solving

Education

Government College of Engineering, Karad | CGPA: 7.04 June 2021 – May 2025

Bachelor of Technology (B.Tech), Electronics and Telecommunication Engineering

Ligade-Patil Junior College of Science, Karad | Percentage: 85.3% June 2020 – August 2021

Higher Secondary Certificate (HSC)

K.C.T's Krishna School, Karad | Percentage: 81.2% June 2018 – March 2019

Secondary School Certificate (CBSE)

Experience

Programmer Analyst Trainee, Cognizant Technology solutions Feb 2025 - May 2025

- Developed scalable web applications using C#, .NET Core Web API, and **Microservices architecture**.
- Implemented **gRPC** for efficient inter-service communication and **Redis** for distributed caching.
- Worked with SQL databases, optimizing queries and managing data efficiently while collaborating in Agile teams.

Projects

Production-Ready Clinical CRM | .NET 8, React, CQRS, MediatR, IndexedDB [GitHub](#)

- Engineered a high-performance CRM using **Vertical Slice Architecture** and **CQRS (MediatR)**, ensuring modularity and decoupling complex business logic for enterprise-scale maintainability.
- Implemented **Predictive Prefetching** and **Optimistic UI strategies** to eliminate perceived API latency, paired with **Offline Resilience** using **IndexedDB** for persistent caching and data obfuscation.
- Developed a **Cascading Lifecycle (Soft Delete Engine)** to manage complex data relationships and a robust **Bulk CSV Import** system with row-by-row validation and duplicate detection.
- Integrated production-grade DevOps features including **Structured Logging (Serilog)**, **Automated Background Jobs** for data health, and **Health Check endpoints** for cloud environment monitoring.

Full Stack E-commerce App | .NET Core, Angular, JWT

- Engineered a full-stack e-commerce platform using Angular for the frontend and ASP.NET Core Web API with JWT-based authentication and role-based authorization.
- Implemented a complete product catalog, shopping cart, and order system using Entity Framework Core and SQL Server.
